Database Assignment 2 solutions

1. create table Employee(
-> name VARCHAR(50),
-> salary double,
-> joining_date VARCHAR(50));
create table Department(
-> name VARCHAR(50),
-> DeptID int,
-> number_of_employees int
->);

2. alter table Department
-> add column ranking int;

3. insert into Department (name, DeptID, number_of_employees, ranking) values ('a', 1, 20, 1), ('b', 2, 30, 2), ('c', 3, 40, 3), ('d', 4, 50, 4), ('e', 5, 60, 5);

4. delete from Department;

5. update Department set salary = 55000 where DeptID = 5;

6. GRANT SELECT ON your_database.employee
-> TO 'readonly_user'@'localhost';

7. REVOKE INSERT ON practice_db.employee
-> FROM 'temp_user'@'localhost';

8. START TRANSACTION;
INSERT into employee (emp_id, emp_name, salary, joining_date) values (106, 'F', 45000, '2026-06-10');
COMMIT;

9. START TRANSACTION;
update employee set salary = 45000 where emp_id = 101;
commit;

10. ALTER TABLE employee

```
   -> ADD COLUMN DeptID INT;
START TRANSACTION;
SAVEPOINT before_dept_update;
UPDATE employee
   -> SET DeptID = 20
   -> WHERE emp_id = 101;
```

11. rollback to before_dept_update;

12. truncate Employee;

13. select * from Employee where salary > 50000;

```
14. UPDATE Department
   -> SET salary = salary + (salary * 0.1)
   -> WHERE DeptID = 10;
```

```
15. SELECT name, DeptID,
   ->       COUNT(*) OVER (PARTITION BY DeptID) AS emp_per_department
   -> FROM Employee;
```

```
16. SELECT d.*
   -> FROM department d
   -> LEFT JOIN employee e
   -> ON d.dept_id = e.DeptID
   -> WHERE e.emp_id IS NULL;
CREATE VIEW mumbai_salespeople AS
   -> SELECT *
   -> FROM employee
   -> WHERE designation = 'Salesperson'
   -> AND city = 'Mumbai';
```

```
17. select emp_name, salary,
   -> Rank() over (order by salary) as rank_according_to_salary
   -> from employee limit 1;
```

```
18. SELECT emp_name, salary,
   ->           RANK() OVER (ORDER BY salary DESC) AS rank_according_to_salary
   ->     FROM employee
   ->    LIMIT 1 OFFSET 1;
```

19. select * from employee order by joining_date desc;

20. alter table department
    -> rename column dept_name to DepartmentName;
